

Erklärung zur Formendatei:

1 Glasbreite

2 Glashöhe

Bsp. an Modell 37:

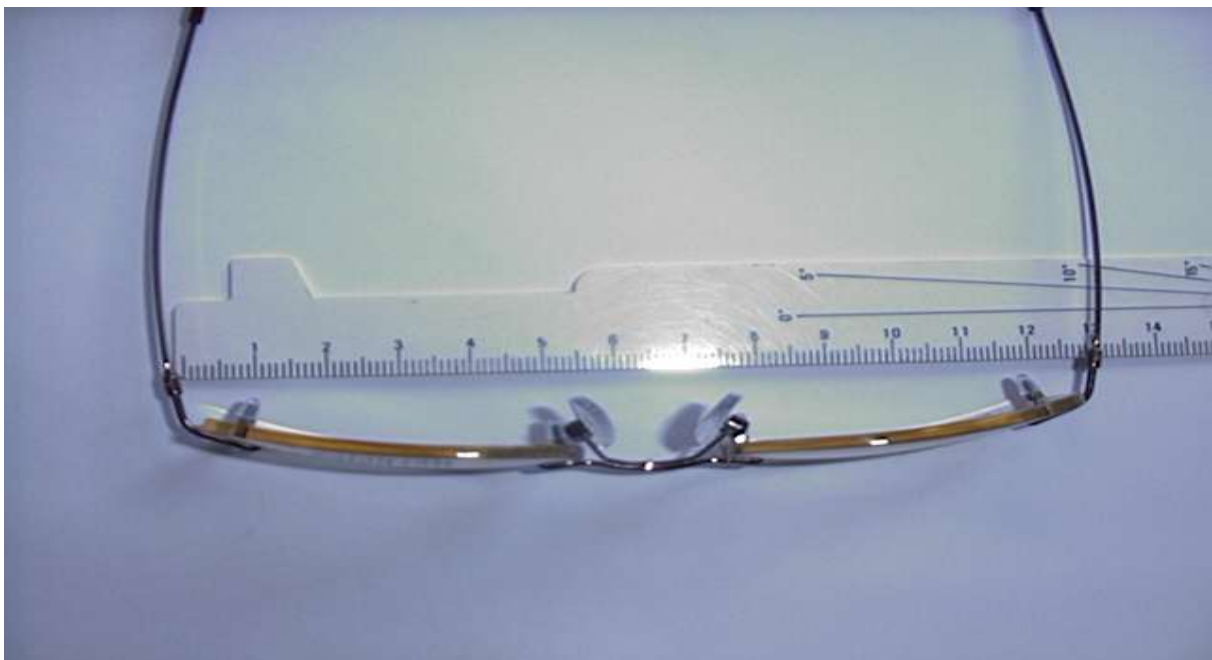

1= 57

2= 40

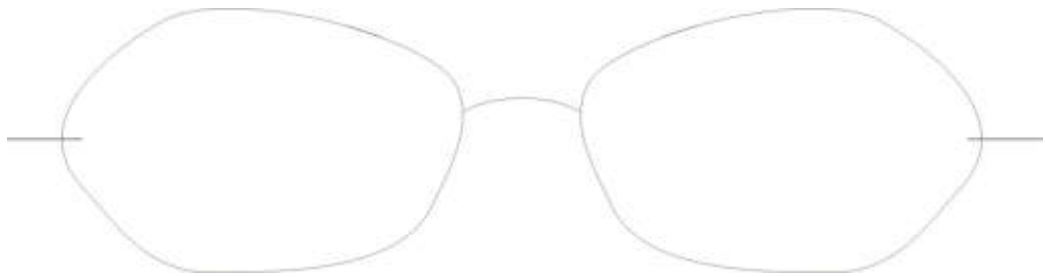

(alle Angaben in Millimeter)

So haben Sie für jede Form die Proportionen. Ändert sich die Glasbreite, so ändert sich proportional auch die Glashöhe. Sie haben aber auch die Möglichkeit uns Maße für eine bestimmte Form anzugeben, auch das ist machbar.

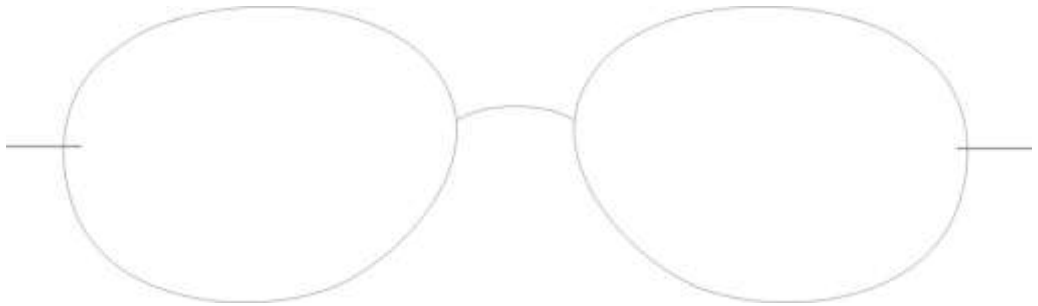

Die Glasmaße ergeben sich immer aus der Gesamtbreite der Brille. Damit die Brille passt, brauchen wir noch eine Gesamtbreite für die neue Brille. Am besten messen Sie dazu bei einer Ihrer Brillen den Abstand von Bügelscharnier zu Bügelscharnier.
